

Professional Growth Goals

Name	Amin Abu Bakar	School year	2026–2027	Role / Department	G9 Level Lead / WASC Coordinator / MYP & DP Physics Teacher / Science Department
-------------	----------------	--------------------	-----------	--------------------------	--

Complete both pages at the beginning of the year. Goals should be meaningful, actionable, evidence-informed, and open to learning and adjustment.

Strategic Initiative Goal

- 1 Connect your professional growth to an ISNS strategic initiative or priority.
Supporting Multilingual Learners, DEIJB Global Competencies, Digital and Media Literacy, or Data-Informed Decision – Making

School Strategic Initiative *Name the school initiative.*

Digital and Media Literacy (AI)

Commented [RW1]: Should this be: Which school strategic initiative....?

Personal Goal Statement *What do you want to strengthen, explore, develop, or change to support your understanding of the initiative?*

To explore how I can use AI to design higher-quality teaching and learning resources that are clearer, better scaffolded, and more responsive to student needs, while keeping sound pedagogy and student learning at the center of the design process.

Rationale and Intended Impact *Why does this matter, and who will benefit? What current curiosity, practice, feedback, data, or observation is informing this goal?*

I have increasingly been using AI as a tool to help me improve the resources I create for students, including more scaffolded worksheets, step-by-step worked solutions, and clearer PowerPoint slides. I want to develop this practice more intentionally and critically, so that AI helps me create resources that make challenging concepts more accessible without reducing rigor. The main beneficiaries will be my students, through resources that better support understanding, progression, and independent learning, while I also develop a more efficient and thoughtful resource-design process.

Action and Learning Plan

Actions and key details	Approx. timing	Support / collaboration needed
Review examples and research on effective AI-supported resource design, with particular attention to scaffolding, cognitive load, accessibility, and maintaining appropriate challenge.	Sep–Oct 2026	
Use AI to develop and refine a range of classroom resources, such as scaffolded worksheets, worked solutions, practice questions, and PowerPoint slides, then critically review and edit the outputs before use.	Throughout 2026–27	Science colleagues
Trial the resources with students and use student work, questions, misconceptions, and feedback to identify where the resources are helping and where further refinement is needed.	Throughout 2026–27	Students and Science colleagues for feedback
Refine my resource-design workflow and share useful examples, approaches, or lessons learned with colleagues.	Throughout 2026–27	Science team and wider faculty

Planned Portfolio Evidence

Choose a small, intentional set of evidence that may demonstrate engagement, learning, progress, changes in practice, and/or impact.

Potential evidence / artifact	What might this evidence help demonstrate?
Before-and-after examples of teaching resources	How AI has supported improvements in clarity, scaffolding, sequencing, and accessibility.
Examples of scaffolded worksheets, worked solutions, and presentation materials	The range and quality of resources developed through an AI-supported design process.
Student work, feedback, or observations from lessons	How the redesigned resources support student understanding, independence, and progression.

This self-directed goal should reflect an area of professional learning, experimentation, or growth that is meaningful to you and connected to your role.

2

Self-Directed Goal

Select a professional-growth goal that is meaningful to you and your role.

Area of Growth or Inquiry *Name the professional practice, skill, knowledge, or question you want to explore.*

Developing as a professional speaker and conference presenter

Personal Goal Statement *What do you want to strengthen, explore, develop, or change to support your understanding of the initiative?*

To strengthen my confidence, clarity, and effectiveness as a presenter so that I can share my professional learning and classroom practice with wider educator audiences at conferences and professional learning events.

Rationale and Intended Impact *Why does this matter, and who will benefit? What current curiosity, practice, feedback, data, or observation is informing this goal?*

I want to become a more confident and engaging speaker as I take on more opportunities to share my work beyond my own classroom and school. I would like to improve how I structure ideas and engage an audience. Developing these skills will support my own professional growth and allow me to contribute more effectively to the wider education community.

Action and Learning Plan

Action and Key Details	Approx. timing	Support / collaboration needed
Study effective conference presenters and identify techniques I can adapt, especially around structure, storytelling, visuals, and audience engagement.	Sep–Oct 2026	Colleagues with presenting experience
Develop and submit conference proposals connected to my professional interests and classroom practice.	Throughout 2026–27	Feedback from colleagues before submission
Rehearse presentations, seek feedback, and refine delivery, timing, slide design, and transitions before each event.	Before each presentation	Trusted colleagues / peers to observe rehearsals
Present at one or more education conferences or professional learning events and reflect on feedback after each presentation.	2026–27 school year	Conference organizers; participant feedback; peer feedback

Planned Portfolio Evidence

Choose a small, intentional set of evidence that may demonstrate engagement, learning, progress, changes in practice, and/or impact.

Potential evidence / artifact	What might this evidence help demonstrate?
Conference proposals and acceptance confirmations	Growth in turning professional ideas into clear, relevant session proposals.
Presentation slide decks and speaking notes	Development in presentation structure, visual communication, and clarity.
Participant, organizer, or peer feedback	How effectively I communicate, engage audiences, and areas to improve.
Post-presentation reflections and next-step notes	Ongoing growth in confidence, delivery, timing, and audience engagement.
